

[Azure DevOps](#) / Azure Test Plans

Azure Test Plans Documentation

Improve your overall code quality by using manual and exploratory testing services for your apps.

Exploratory & manual testing

Drive quality and collaboration throughout the development process using a rich set of tools.

Request stakeholder feedback

Request feedback on your working apps and quickly capture it within a work item form.

Continuous testing

Automate build-deploy-test workflows to test your changes in a fast, scalable, and efficient manner.

Unit & functional testing

Maintain code health, avoid regressions, and achieve code coverage using Visual Studio.

Settings

Configure test plan policies and permissions.
