# Filter lists, boards, and directories

Azure DevOps Services | Azure DevOps Server 2019 | TFS 2018 | TFS 2017

Several applications and pages support filtering, which is very useful when a large number of artifacts or items have been defined. Most directory views provide one or more filter functions.

You can filter most items using keywords or a user name for an author of an item or where work is assigned to them. You can filter lists and boards in the following areas:

- Git repositories: Branches, Commits, Commit history, Pull Requests, Pushes, and Repositories
- Work tracking: Work Items, Kanban boards, Backlogs, Sprint Backlogs, and Taskboards
- Directories: Dashboards, Boards, Backlogs, Sprints, Queries, Builds, Releases

### Observação

You may have fewer or additional filter options based on the [features you've enabled](#) or the platform and version that you are working from.

## Filter based on keywords, tags, or fields

To turn filtering on, choose the  filter icon.

You can filter work items by typing a keyword or using one or more of the fields provided, such as work item type, assigned to, state, and tags. Based on the keyword that you enter, the filter function will list work items based on any visible/displayed column or field, including tags. Also, you can enter a value for an ID, whether or not the ID field is visible.

Backlog items

Backlog Board Forecast Off Parents Hide In progress items Show Mapping Off ⚙️ [ ]

Filter by keyword Types Assigned to

States Tags Clear

Type Product Backlog Item X

Title Add

	Order	State	Title	Tags	Iteration Path
+	1	● Approved	📄 Hello World Web Site	...	Fabrikam Fiber\Release 1\Sprint 11
	2	● New	📄 Change initial view	Web	Fabrikam Fiber\Release 1\Sprint 9
	3	● New	> 🐛 Slow response on information form		Fabrikam Fiber\Release 1\Sprint 9

The filtered set is always a flat list, even if you've selected to show parents.

## Characters ignored by keyword filter criteria

The filter criteria ignores the following characters:  (comma),  (period),  (forward slash), and  (back slash).

## Filter directories

Choose the  filter icon to filter a directory list by keyword, team, or other supported field. Keywords apply to titles, descriptions, and team names.

For example, here we turn filtering on for the dashboard directory.

## Dashboards
