Neste artigo

Enable features for your use

Enable features at the organization level (for all users)

Features now enabled for all Azure DevOps Services

Azure DevOps Services

As new features are introduced, you can turn them on or off. That way, you can try them out, provide feedback, and work with those features that meet your requirements.

Some features provide a new user interface and functionality, which can be managed per user or team member. Others support a default experience for the account and are managed by an account administrator.

> ⓘ **Observação**
>
> You can turn on or off select features for Azure DevOps Services. Preview features become available first on Azure DevOps Services and then become standard features with an update to Azure DevOps Server. At some point, the preview feature moves out of preview status and becomes a regular feature of the web portal.

Preview features per user

- Analytics Views
- Experimental themes
- Git commit menu extension points
- New build result page
- New log reader for Pipelines
- New PAT experience
- New release progress views
- New YAML pipeline creation experience
- Test analytics in new web platform
- Test tab in new web platform

Preview features per organization

- Analytics Views
- Experimental themes
- Full Access to Azure Pipelines for Stakeholders
- Git Forks
- New build result page
- New log reader for Pipelines
- New PAT experience
- New release progress views
- New Releases Hub
- New YAML pipeline creation experience
- Test analytics in new web platform
- Test tab in new web platform

Enable features for your use

From time to time, a new feature is introduced in Preview mode, which allows you to turn it on or off.

1. To access the Preview features options, open your profile menu, and select **Preview features**.

2. To enable or disable a feature, choose the slider.

Enable features at the organization level (for all users)

When you enable a feature at the organization level, you essentially turn it on for all users of your account. Each user can then disable the feature if they so choose.

💡 **Dica**

If you don't see the **for this account** menu option, then you aren't an account administrator. To get added as one, see **Add administrators, set permissions at the team project or collection level**.

Preview features

×

The following preview features are available for your evaluation. Help us make them better!

for this account [fabrikam]   ∨

Experimental Themes   ⬤ On

Adds an early preview of various themes to the Theme management panel.

Full access to Azure Pipelines for Stakeholders   ⬤ On

Gives users with the Stakeholder license full access to Azure Pipelines for private projects. Limit what they can do by using security groups and permissions. Turning on this feature doesn't affect public projects, where Stakeholders always have full access. Learn more

Git Forks   ⬤ On

Enable git repositories to be forked. Learn more

New build result page   ⬤ On

Lights up new build results page.

New log reader for Pipelines   ⬤ Off

Lights up new logs reader for Pipelines.

New PAT Experience   ⬤ On

Enable new Personal access token page on security hub.

New release progress views   ⬤ On

Turn on the new release views to visualize the progress of your deployment pipelines. Learn more

New Releases Hub   ⬤ On

Turns on the experience to create folders and manage release pipelines.

New YAML pipeline creation experience   ⬤ Off

Enables the new YAML pipeline creation experience.

Test analytics in new web platform   ⬤ On

Lights up test analytics features in new web platform.

Test tab in new web platform   ⬤ On

Lights up a new test tab under build in new web platform.
