Boards (Kanban)

18/11/2018 • 2 minutos para ler • Colaboradores 🟤 🟠

Neste artigo

Azure Boards | Azure DevOps Server 2019 | TFS 2018 | TFS 2017 | TFS 2015 | TFS 2013

Collaborate with others by adding, updating, and reviewing your work items as cards on a Kanban board.

If you're a project administrator just getting started, review the Configure settings and manage your Azure Boards project to learn more about defining area and iteration paths and customizing your work item types. If you want to add another Kanban board, you do that by adding a team. For details, see About teams and Agile tools.

5-Minute Quickstarts

- Kanban board quickstart

Step-by-Step Tutorials

- Kanban board basics
- Task checklists
- Epics & features
- Add inline tests
- Cumulative flow
- Enable live updates

Concepts

- Kanban best practices
