Azure DevOps Services | Azure DevOps Server 2019 | TFS 2018 | TFS 2017

Select the service of interest to get started adding new artifacts or objects. For example, to add work items, choose **Boards** or **Work**. Some artifacts—such as a product backlog, Kanban board, portfolio backlogs—are added when you add a team.

Prior to adding an artifact, make sure that you've selected the project and repository that you want to work in.

Add work items, queries, or other work tracking artifacts

You can quickly add a query or work item when working from a **Boards** or **Work** page.

Choose a **Boards** page—such as **Work Items**, **Boards**, or **Backlogs**. Then choose the ➕ plus icon and select from the menu of options.

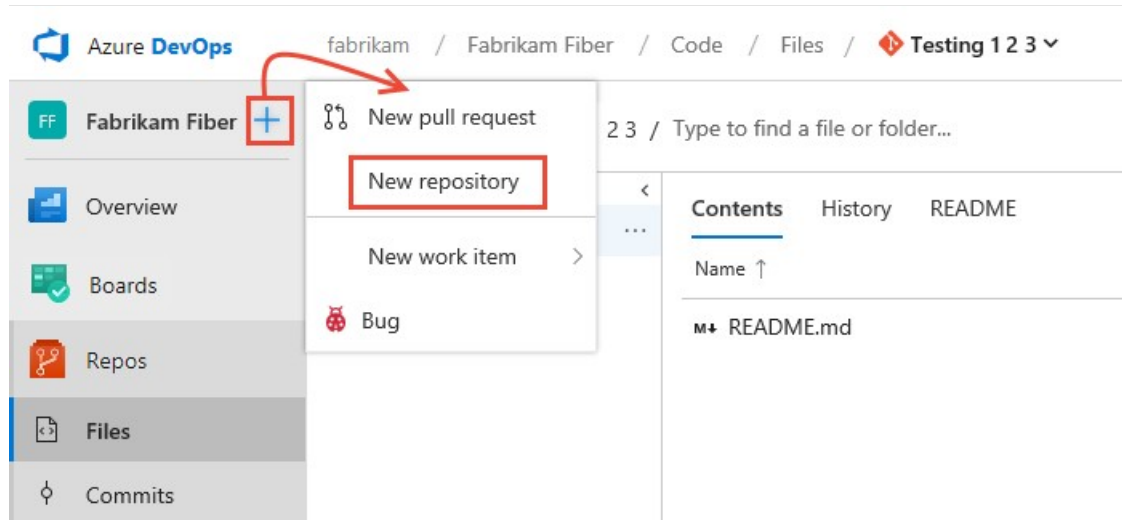

To add other work tracking artifacts, see one of the following articles:

- To add a board, backlog, or sprint backlog, first add a team which will be associated with those artifacts
- Add a delivery plan
- Add a managed work item query
- Add work items.

Add a pull request or Git repository

You can quickly add a pull request, Git repository, or work item using the **Add** menu when working from **Code**.

Expand the **Repos** service and choose **Files**, **Commits**, or **Pull Requests** (Git repos) or **Files**, **Changesets**, or **Shelvesets** (TFVC). Then, choose the ╋ plus icon and select from the menu of options.

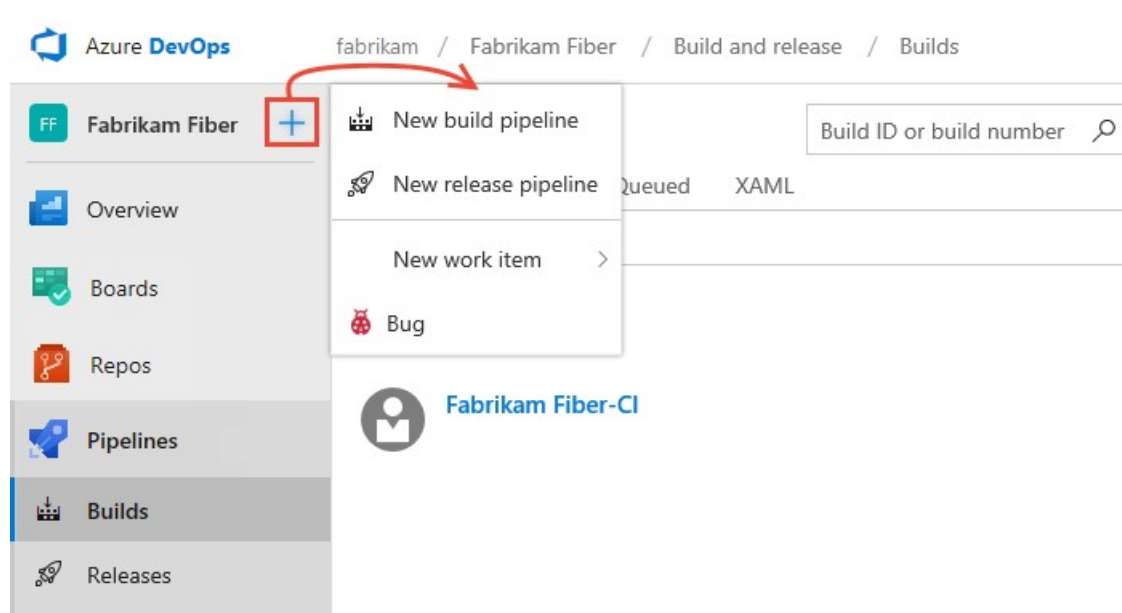

For details on adding a Git repository, see Git repository.

Note that you can only add one TFVC repository per project, but an unlimited number of Git repositories. To learn more about Git artifacts, see one of the following articles:

- Git repository
- Git branch
- Git pull request
- Add work items

Add build and release pipelines

Expand **Pipelines** and choose **Builds** or **Releases**. Then choose the ╋ plus icon and select from the menu of options.

To learn more about adding other pipeline related artifacts, see the following articles:

- Deployment groups
- Task groups
- Variable groups
- Secure files

Add a team

Agile tools and dashboards are typically associated with teams. You add teams to a project. To learn more about teams, see About teams and Agile tools. To add a team, see Add a team and team members.

View teams already defined

To view the set of defined teams, open **Project settings**, and choose **Overview**.

Add a dashboard

Dashboards are associated with a team. Each team can create and configure a number of dashboards. To learn how, see Add a dashboard.

Add a wiki

If you don't have a wiki yet, you can add one. Once added, you can add and update pages to that wiki.

- Create a wiki
- Add and edit wiki pages
- Publish a Git repository to a wiki
