The Analytics service

Roadmap timeline

Azure DevOps Services | Azure DevOps Server 2019

The future of reporting for Azure DevOps and Azure DevOps Server is the Analytics Service.

> ⊘ **Observação**
>
> If you are looking for information about the Azure Analysis Services, see **Azure Analysis Services**.

The Analytics service

The Analytics Service in available for all organizations using Azure DevOps Services. It provides several advanced widgets. Power BI integration and access to the OData feed of the Analytics Service remain in Preview.

To learn more, see What is the Analytics Service. It currently contains partial data. We are working to add all reportable data to the Analytics Service. See Data Available in Analytics for more information.

Roadmap timeline

Check out the Features Timeline for the roadmap of reporting features.
