Several features depend on the project, repository, or team that you have selected. For example, dashboards, backlogs, and board views will change depending on the project and team you select.
Also, when you add a work item, the system references the default area and iteration paths defined for the team context. Work items you add from the team dashboard (new work item widget) and queries page are assigned the team default iteration. Work items you add from a team backlog or board, are assigned the team default backlog iteration. To learn more, see About teams and Agile tools.
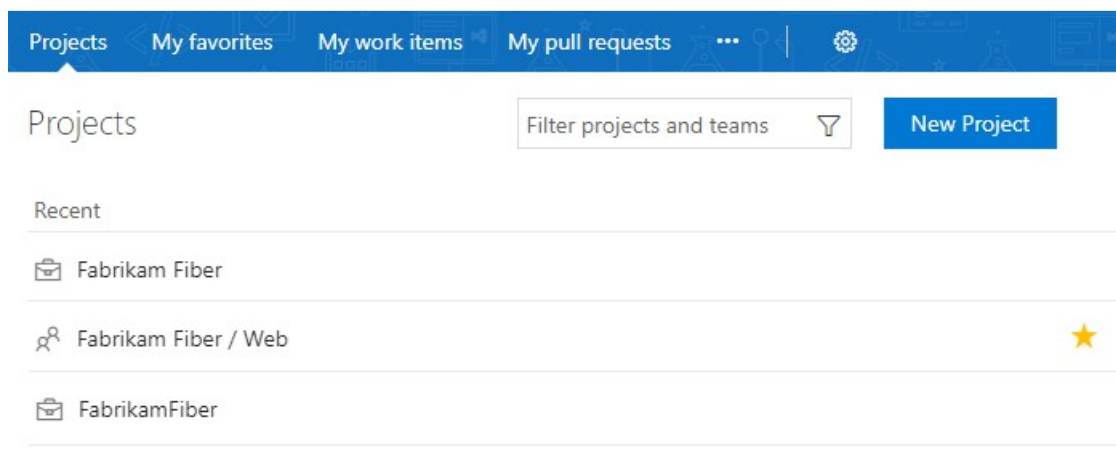

View and open a project

From the **Projects** page you can quickly navigate to a project that you have permissions to view.

From the **Projects** page you can quickly navigate to a project or a team that you've accessed or worked in previously. Projects and teams are listed in the order you've last accessed, with the most recent five projects accessed appearing first. All projects you've accessed are listed within the **All** section.
1. Choose the 🟦 Azure DevOps logo to open **Projects**.

The projects you most recently viewed are displayed, followed by a list of all projects in alphabetic order.

2. As you hover over a project or team, you can choose one of the links to go to **Home** or **Dashboards**, **Code**, **Work**, **Build and Release**, **Test**, or **Wiki** pages. Choose the ☆ star icon to mark the project as a favorite.

3. You can filter the project and team list using the *Filter projects and teams* search box. Simply type a keyword contained within the name of a project or team. Here we type **Fabrikam** to find all projects or teams with *Fabrikam* in their name.

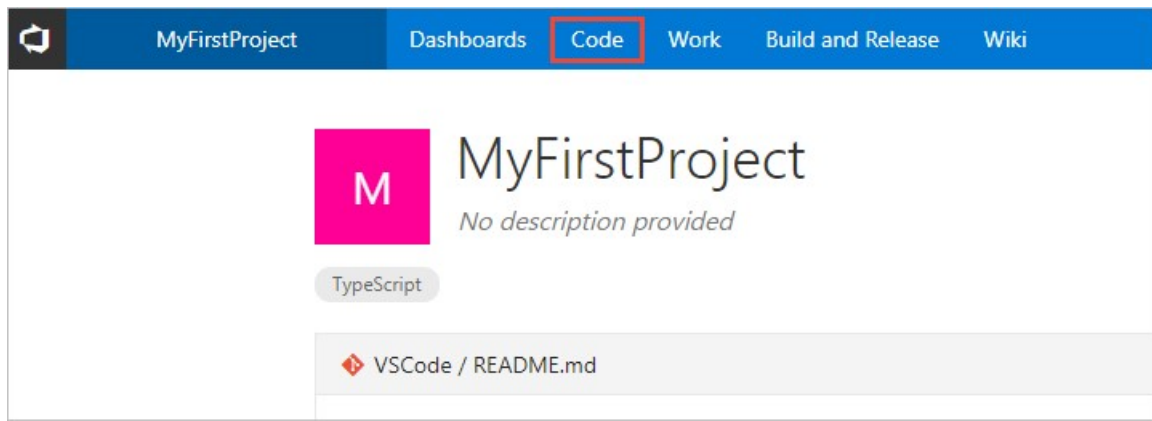

4. Choose **New Project** to add a project. You must be an account administrator or a member of the Project Collection Administrators group to add a project.

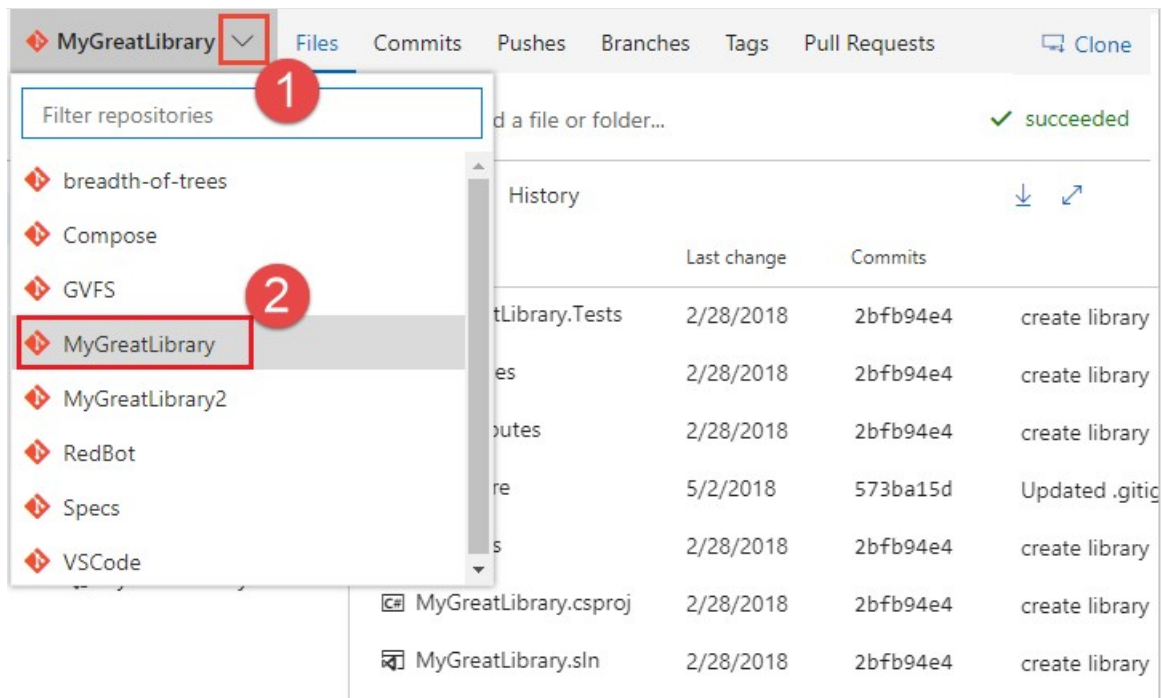

## View and open a repository

1. Choose **Code**.

2. Select the repository from the selector.

Switch to a different team

You can switch your team focus to one that you've recently viewed from the project/team selector. If you don't see the team or project you want, choose **Browse...** or choose the Azure DevOps logo to access the Projects page.
