k or Alt+p	Select previous item
Ctrl+Shift+f	Filter results

Team Explorer Query editor and results

When working in Visual Studio Team Explorer, you can use the following keyboard shortcuts. Use query results shortcuts whenever you have a list of work items, such as the query results view or a list of linked work items within a work item form.

| Query editor	Action	Query results	Action
→ ←	Move focus left/right	→ ←	Scroll left/right
↑ ↓	Move focus up/down	**PgUp/PgDn**	Scroll up/down
Shift+ ↑ ↓	Highlight consecutive clauses	**Shift+** ↑ ↓	Highlight consecutive rows
Shift+ →	Move focus left one field at a time	**Shift+Alt,n**	Move focus to next item
Shift+ ←	Move focus right one field at a time	**Shift+Alt,p**	Move focus to previous item

Query editor	Action	Query results	Action
End	Move focus to end of current clause	**End**	Move focus to bottom of list
Enter	Move focus down	**Enter**	Open selected work item
Tab	Move focus right, one field at a time	**Home**	Move focus to top of list
Ctrl+c	Copy selected clause	**+/-**	Expand/collapse current row
Ctrl+s	Save changes (editor)	**Ctrl+s**	Save changes (results)
Ctrl+v	Paste copied clause	**F5**	Refresh
Del	Delete contents of current field or clause
